

# MOST IN DEMAND SKILLS ON LINKEDIN 2016

## Go digit? Go safe

A lot of companies are now heading for a full digital transformation, the market is demanding more and more tech skills, in fact most of 2016 skills list are tech. Which increased the importance of protecting networks and data from breaches, intrusions and other threats. That's why demanding for the **network & information security** increased and took the 6th rank this year. If you are looking for a job in Australia, China, Ireland and South Africa, I strongly recommend learning that skill, as it ranks among the top five skills in those countries.

## The most advanced country technologically

If you are living in the united states and aspire to advance your career, you better think about acquiring more tech skills. Among the 14 countries on the list, the united states was the most in demand for those skills. With 8 skills, which 100% of them were tech skills, and 75% were more than or equal to the global average rank. I guess we can say that the united states is the tech master.

## All eyes on users interface design

With **statistical analysis & data mining** holding the 2nd spot on the list for two years in a row, the need for **User interface design** increased. It jumped significantly from the 10th rank to the 5th in 2016. That relationship can be attributed to the fact that user interface is the module of data mining system that helps the communication between users and the data mining system\*. this is a good time to enhance the user interface design skill and increase your chances in getting a job.
